### Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". - During the current period, the Group has negotiated with a bank to convert an amount of AED 15 million of their outstanding overdraft balances to a long term loan facility. The term loan is subject to certain financial covenants including maintaining a debt to equity ratio of 3:1. However as at the reporting date, the Group has not complied with this financial covenant as specified in the facility letter with the bank and accordingly the Group has classified the outstanding balance of AED 15 million as a current borrowing.
- Bank borrowings are mainly secured by mortgages over plant and machinery, hypothecation of inventories and assignment of receivables.
- Bank overdraft and trust receipts are also subject to certain financial covenants including minimum tangible worth of AED 120 million, leverage ratio not to exceed 2 and minimum current ratio 1:1. However as at the reporting date, the Group has not complied with financial covenants above as specified in the facility letters with the bank. However, based on the relationship with the creditor banks, the Group's Directors have confirmed that the above mentioned non-compliance is not likely to affect the continuation of the Group's bank facilities and hence will not have a significant impact on the operations.

Financial assets consist of cash and cash equivalents, trade and other receivables and available-forsale investments. Financial liabilities consist of short term borrowings, long term borrowings and trade and other payables.

The fair values of financial instruments are not materially different from their carrying values.

### Valuation of financial instruments

The Group measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: inputs that are quoted market price (unadjusted) in an active market for identical instruments.

Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted market prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: inputs that are unobservable. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.
