Independent Auditors' Report on Review of Condensed Consolidated Interim Financial Statements

To the Shareholders of Unikai Foods (P.J.S.C.)

Introduction

We have reviewed the accompanying 30 June 2018 condensed consolidated interim financial statements of Unikai Foods (P.J.S.C.) ("the Company") and its subsidiary (collectively referred to as "the Group"), which comprise:

- the condensed consolidated income statement for the three month and six month periods ended 30 June 2018;
- the condensed consolidated statement of profit or loss and other comprehensive income for the three month and six month periods ended 30 June 2018;
- the condensed consolidated statement of financial position as at 30 June 2018:
- the condensed consolidated statement of cash flows for the six month period ended 30 June 2018;
- the condensed consolidated statement of changes in equity for the six month period ended 30 June 2018; and
- notes to the condensed consolidated interim financial statements.

Management is responsible for the preparation and presentation of these condensed consolidated interim financial statements in accordance with *IAS 34, 'Interim Financial Reporting'*. Our responsibility is to express a conclusion on these condensed consolidated interim financial statements based on our review.

Independent Auditors' Report on Review of Condensed

Consolidated Interim Financial Statements

30 June 2018

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of the interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial statements as at 30 June 2018 are not prepared, in all material respects, in accordance with *IAS 34*, 'Interim Financial Reporting'.

KPMG Lower Gulf Limited

Notes to the condensed consolidated interim financial statements for the six month period ended 30 June 2018 (unaudited)

1. Reporting entity

Unikai Foods (P.J.S.C.) ("the Company") is a Public Shareholding Company incorporated on 11 April 1977 by a Decree from His Highness, The Ruler of Dubai. The Company's equity securities are listed on Dubai Financial Market. The Company holds 100% equity in Unikai and Company LLC ("the Subsidiary"), registered as a limited liability company in the Sultanate of Oman under Commercial Register No. 3/74. The Company and its Subsidiary are collectively referred to as "the Group". The legal status of the Subsidiary is set out in note 20.

The Group is engaged in the manufacturing of dairy, juice and ice cream products and import of various kinds of food products for distribution throughout the Gulf and other countries. The trading activities of the Group are carried on in the name of "Unikai International" for which the Company holds a separate trade license with the name "Unikai International P.J.S.C.". The registered address of the Company is P.O. Box 6424, Dubai, UAE.

2. Basis of preparation

Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting, and should be read in conjunction with the consolidated financial statements of the Group for the year ended 31 December 2017. These do not include all of the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance since 31 December 2017.

Basis of measurement

These condensed consolidated interim financial statements have been presented on the historical cost basis except for investment property, available for sale investments and investments carried at fair value through profit or loss ("FVTPL"), which are measured at fair value.

Functional and presentation currency

These condensed consolidated interim financial statements are presented in United Arab Emirates Dirham ("AED"), rounded to nearest thousand except when otherwise indicated, which is the Company's functional currency.

Accounting estimates and judgments

The preparation of condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

The significant judgments made by the management in applying the Group's accounting policies and the key source of estimation uncertainty were the same as those that were applied in preparation of the consolidated financial statements of the Group as at and for the year ended 31 December 2017, except for new significant judgements and key sources of estimation uncertainty related to the application of IFRS 15 and IFRS 9, which are described in note 4.

Notes to the condensed consolidated interim financial statements for the six month period ended 30 June 2018 (unaudited)

3. Significant accounting policies

The accounting policies applied in the preparation of the condensed consolidated interim financial statements are consistent with those applied by the Group in its consolidated financial statements as at and for the year ended 31 December 2017, except for adoption of a new accounting policy on investment properties (refer below) and changes in accounting policies due to the first time application of IFRS 15 and IFRS 9, which are described in note 4.

Investment properties

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Investment property is initially measured at cost and subsequently at fair value with any change therein recognised in profit or loss.

Cost includes expenditure that is directly attributable to the acquisition of the investment property. The cost of self-constructed investment property includes the cost of materials and direct labour, any other costs directly attributable to bringing the investment property to a working condition for their intended use and capitalised borrowing costs.

Any gain or loss on disposal of an investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in profit or loss.

When the use of a property changes from owner-occupied to investment property, the property is reclassified as investment property and carried at fair value, subsequently. On the day of the transfer, any resulting fair valuation gain is carried as revaluation surplus under equity. Subsequent changes in the fair value are recorded in profit or loss. The revaluation surplus is transferred to retained earnings upon disposal/sale of the investment property.

When the use of a property changes such that it is reclassified as property, plant and equipment, its fair value at the date of reclassification becomes its cost for subsequent accounting.

Financial assets and liabilities

The accounting policies, classifications and measurement principles for financial assets and liabilities applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as at and for the year ended 31 December 2017. These are disclosed in detail under note 3 in the Group's consolidated financial statements as at and for the year ended 31 December 2017, except for changes in accounting policies related to the application of IFRS 15 and IFRS 9 during the current period, which are described in note 4.

4. Changes in significant accounting policies

The Group has initially adopted IFRS 15 Revenue from Contracts with Customers (refer note 4a) and IFRS 9 Financial Instruments (refer note 4b) from 1 January 2018.

The changes in accounting policies are also expected to be reflected in the Group's consolidated financial statements as at and for the year ending 31 December 2018.

Notes to the condensed consolidated interim financial statements for the six month period ended 30 June 2018 (unaudited)

4 Changes in significant accounting policies (continued)

4a IFRS 15 Revenue from Contracts with Customers

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It replaced IAS 18 Revenue, IAS 11 Construction Contracts and related interpretations.

Revenue from sale of goods

Under IFRS 15, revenue is recognised when a customer obtains control of the goods or services. Determining the timing of the transfer of control – at a point in time or over time – requires judgement.

The Group recognises revenue from sale of goods based on a five step model as set out in IFRS 15:

- Step 1 Identify the contract(s) with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.
- Step 2 Identify the performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer goods to the customer.
- Step 3 Determine the transaction price: The transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring promised goods to a customer, excluding amounts collected on behalf of third parties.
- Step 4 Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Group will allocate the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Group expects to be entitled in exchange for satisfying each performance obligation.
- Step 5 Recognise revenue when (or as) the entity satisfies a performance obligation.

The Group satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met:

- The customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs; or
- 2. The Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- The Group's performance does not create an asset with an alternative use to the Group and the entity has an enforceable right to payment for performance completed to date.

For performance obligations where one of the above conditions are not met, revenue is recognised at the point in time at which performance obligation is satisfied.

When the Group satisfies a performance obligation by delivering the promised goods, it creates a contract asset based on the amount of consideration earned by the performance. Where the amount of consideration received from a customer exceeds the amount of revenue recognised, this gives rise to a contract liability.

Based on the management's assessment, the application of IFRS 15 has no significant impact on the condensed consolidated interim financial statements of the Group as revenue recognition under the revised accounting policy is similar to the revenue being recognized previously.

Notes to the condensed consolidated interim financial statements for the six month period ended 30 June 2018 (unaudited)

4 Changes in significant accounting policies (continued)

4b IFRS 9 Financial Instruments

IFRS 9 sets out requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This standard replaces IAS 39 Financial Instruments.

The details of new significant accounting policies and the nature and effect of the changes to previous policies are set out below:

Classification and measurement of financial assets and financial liabilities

IFRS 9 largely retains the existing requirements in IAS 39 for the classification and measurement of financial liabilities. However, it eliminates the previous IAS 39 categories for financial assets of held to maturity, loans and receivables and available for sale.

The adoption of IFRS 9 has not had a significant effect on the Group's accounting policies related to financial liabilities and derivative financial instruments. The impact of IFRS 9 on the classification and measurement of financial assets is set out below.

Under IFRS 9, on initial recognition, a financial asset is classified as measured at: amortised cost; FVTOCI – equity investment; or FVTPL. The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. Derivatives embedded in contracts where the host is a financial asset in the scope of the standard are never separated. Instead, the hybrid financial instrument as a whole is assessed for classification.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows;
 and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVTOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

Notes to the condensed consolidated interim financial statements for the six month period ended 30 June 2018 (unaudited)

4 Changes in significant accounting policies (continued)

4b IFRS 9 Financial Instruments (continued)

Classification and measurement of financial assets and financial liabilities (continued)

All financial assets not classified as measured at amortised cost or FVTOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVTOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

A financial asset (unless it is a trade receivable without a significant financing component that is initially measured at the transaction price) is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition.

The following accounting policies apply to the subsequent measurement of financial assets.

Financial assets at FVTPL

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Equity investments at FVTOCI

These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

Debt investments at FVOCI

These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

The following table and the accompanying notes below explain the original measurement categories under IAS 39 and the new measurement categories under IFRS 9 for each class of the Group's financial assets as at 1 January 2018.

Total financial assets				94,052	94,746

a) Under IAS 39, these equity securities were designated as available for sale because these were held for the long term for strategic purposes. On transition to IFRS 9, the Group has reclassified these equity investments from available for sale under IAS 39 to investments carried at FVTPL under IFRS 9. Fair valuation gain amounting to AED 8.3 million related to those investments has been recorded in retained earnings as at the date of the transfer i.e. 1 January 2018. The fair value of these investments was measured by an external expert engaged by management and was based on the capitalization of future maintainable earnings method of valuation.

Previously these investments were carried at cost. As a result a fair value gain of AED 8.3 million was recorded in retained earnings.

b) Trade and other receivables, cash and cash equivalents and due from related parties that were classified as loans and receivables under IAS 39 are now classified at amortised cost. An increase of AED 7.6 million in the allowance for impairment over trade receivables was recognized in opening retained earnings at 1 January 2018 on transition to IFRS 9. Also, refer to note 12.

Notes to the condensed consolidated interim financial statements for the six month period ended 30 June 2018 (unaudited)

4 Changes in significant accounting policies (continued)

4b IFRS 9 Financial Instruments (continued)

Impairment of financial assets

IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' (ECL) model. The new impairment model applies to financial assets measured at amortised cost but not to investments in equity instruments. Under IFRS 9, credit losses are recognised earlier than under IAS 39.

The financial assets at amortised cost consist of trade and other receivables, due from related parties and cash and cash equivalents.

Under IFRS 9, loss allowances are measured on either of the following bases:

- 12-month ECLs: these are ECLs that result from possible default events within the 12 months after the reporting date; and
- lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument.

The Group has elected to measure loss allowances for trade receivables at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment and including forward-looking information.

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is more than 365 days past due.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

4 Changes in significant accounting policies (continued)

4b IFRS 9 Financial Instruments (continued)

Impairment of financial assets (continued)

Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost is credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Presentation of impairment

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Impairment losses related to trade and other receivables, due from related parties and cash and cash equivalents are presented separately in the income statement. Impairment losses on other financial assets are presented under 'finance costs', similar to the presentation under IAS 39, and not presented separately in the income statement.

Impact of the new impairment model

For assets in the scope of the IFRS 9 impairment model, impairment losses are generally expected to increase and become more volatile. The Group has determined that the application of IFRS 9's impairment requirements at 1 January 2018 results in an additional impairment allowance as follows:

Loss allowance at 31 December 2017 Under IAS 39 Additional impairment recognised at 1 January 2018 on trade	8,746
receivables	7,598
Loss allowance at 1 January 2018 under IFRS 9	16,344

The ECLs were calculated based on actual credit loss experience over the recent years.

Impact of adopting IFRS 9 on opening balance of equity

The Group management has decided not to restate comparative information for prior periods with respect to classification and measurement (including impairment) changes. Differences in the carrying amounts of financial assets and financial liabilities resulting from the adoption of IFRS 9 has been recognized in equity as at 1 January 2018.

The following table summarises the impact, of transition to IFRS 9 on the opening balance of fair value reserves and retained earnings as at 1 January 2018:

Retained earnings and reserves	AED 000
Recognition of expected credit losses under IFRS 9	(7,598)
Changes in fair value of investments	8,292
Impact at 1 January 2018	694

7. Other income

Other income for the six month period ended 30 June 2018 mainly includes rental income amounting to AED 1.6 million (six month period ended 30 June 2017: AED 1.5 million).

8. Property, plant and equipment

Additions (unaudited)

During the six month period ended 30 June 2018, the Group acquired assets amounting to AED 7 million (six month period ended 30 June 2017: AED 6.1 million).

Transfer to investment property (unaudited)

During the period, the Group has reclassified a labor accommodation building from property, plant and equipment to investment property as a result of change in the use of the property. The property has been let to a third party. As at the date of transfer, the fair value of the property was measured and the resulting gain of AED 6.2 million was recognised in other comprehensive income. This has been presented as the revaluation surplus under equity in statement of financial position.

9. Investment property

	30 June	31 December	30 June
	2018	2017	2017
	AED 000	AED 000	AED 000
	(Unaudited)	(Audited)	(Unaudited)
Investment property	12,500		-

Refer to note 8 for transfer of an earlier owner-occupied property to investment property. The fair values of investment properties were determined by external, independent property valuer as at 31 March 2018, having appropriate recognised professional qualifications and recent experience in the location and category of property being valued. Income capitalization approach was used by taking into account expected market rental growth, occupancy rate and discount rate. The fair value measurement of buildings of AED 12.5 million has been categorised as a Level 3 fair value based on the inputs to the valuation techniques used.

The management have reassessed the fair value of the investment property as at 30 June 2018 and have assessed that there are no significant change in the value of the property.
